

Ideas how to cut on the water consumption

(conclusions from the discussions during the Brno meeting, 3th–8th May 2015)

1. Have a short shower instead of a bath
2. Use taps with special endings (low-flow tap aerators), and shower heads
3. Turn off the tap while brushing your teeth or shaving
4. Use a push button toilet cistern (dual flush system)
5. Use the dishwasher instead of washing dishes in the sink
6. Run the dishwasher (or the washing machine) only when it is full
7. Reuse water, and use the rainwater
8. Use a basin to rinse your fruits and vegetables
9. Use a bucket of water, not a hose, for washing your car etc
10. Fix leaking taps asap
11. Do not fill the kettle to the brim if you are making only two cups of coffee
12. Have a jug of drinking water in the fridge
13. Do not throw away bottled drinking water
